SOLARIA

FRACTIONAL
SKIN RESURFACING TREATMENT

INMODE

INTRODUCING THE BEST VERSION OF YOU.

Solaria is an advanced carbon dioxide (CO₂) fractional laser technology designed to resurface your skin. CO₂ fractional ablative skin resurfacing is the non-surgical gold standard for delivering skin resurfacing. It effectively treats a variety of different concerns in as little as a single session.

Solaria treatments are a safe and convenient option to help you reveal natural-looking results.

**TRUSTED TECHNOLOGY.
PRECISION TREATMENTS.
EXCEPTIONAL RESULTS.**

MINIMAL DOWNTIME. RADIANT RESULTS.

Solaria is a non-invasive procedure that delivers precise columns of microscopic laser energy to your skin. It treats specific areas in a controlled, uniform manner while leaving surrounding healthy tissues untouched, which results in deep ablation, minimal downtime, and maximum results.

This customizable, in-office procedure provides targeted treatments to address your unique concerns. You can improve problem areas on your face or other body areas such as the neck, décolletage, hands, or abdomen. Solaria is an ideal alternative for delivering optimal results for your busy lifestyle.

Take control of your face, body, and self-confidence.

Look as incredible as you feel.
