TONE

HANDS-FREE MUSCLE TONING TREATMENT

A customizable solution to improve the definition of your natural physique.

Achieve the look you have always wanted without the gym.

WHAT IS TONE?

Tone is an innovative, non-invasive solution designed specifically to increase muscle strength. It is a nonsurgical procedure which will enhance your shape and tone.

Treatments are customized and tailored to address your specific needs so that the result is a more defined appearance without incisions, scarring, or downtime.

HOW DOES TONE WORK?

Tone uses electrical muscle stimulation (EMS) to target specific muscle groups and induce involuntary muscle contractions. It is a safe and effective procedure that takes approximately 30 minutes. Tone is an easy, zero downtime alternative to surgical procedures for achieving sculpted muscles.

WHAT CAN I EXPECT DURING THIS TREATMENT?

Most patients find Tone comfortable. During your treatment you can expect the Tone applicators to emit electrical pulses that will induce muscle contractions. You will feel your muscles contract similar to what you would experience during a workout. Your treatment can be adjusted progressively to your comfort level.

HOW MANY SESSIONS ARE RECOMMENDED?

Your practitioner will recommend the ideal combination of sessions to be performed based on your personal objectives. Treatment times and frequency will be specifically tailored to obtain the optimal results.

WHAT KIND OF POST PROCEDURE CARE IS REQUIRED?

There is zero downtime associated with Tone. It is a quick and painless treatment that can be done over your lunchtime, allowing you to return to your normal activities immediately. Patients may notice redness and warmth in the treated area which will subside after a few hours.

Please speak to your provider to see if you are a candidate.
